

# LOT 7 Captain Jak

## DISCLOSURE

As a weanling Captain Jak received an eye injury that resulted in a Corneal Ulcer. The injury was immediately seen by a veterinarian and treated with topical antibiotics, along with topical and systemic anti-inflammatory medications.

The eye healed very well. There is a small scar in the eye from the initial damage. His vision is not at all impaired.

As a yearling he was bitten on his lower back which also resulted in a small amount of scar tissue. He has never had any pain or lameness associated with this cosmetic addition.

Please do not hesitate to contact us if you would like any more information.
